Technical Seminar on Financial Management for Control and Planning

On 10 October 2007 (Friday), a delegation of 48 IET Hong Kong members attended a technical seminar on financial management for control and planning conducted by Mr. Alex Tam, Certified Financial Planner from First State Investments.

The seminar aimed to introduce the participants to the basis of financial management which includes asset management, risk management, investment management, personal financial management and the trade-off between risk and expected return. He shared his experience on financial planning which is beneficial to our members - playing the dual role as “Manager“and “Engineer”. Also, we gained knowledge of the global market outlook, especially in blooming China. We were inspired to review and analyze the financial conditions and situations nowadays to cope with the market changes in technical areas.

Active floor discussions about the financial management were raised during the Q&A section. It took about two and half hours to finish the seminar.

The Management Section Committee chairman Y W Yim and members would like to take this opportunity to thank Mr. Alex Tam for his valuable contribution to the success of the seminar.
