Reliance Globalcom is a cable based external fixed service operator, operating 'Fiber-Optic Link Around the Globe' (FLAG) Europe Asia (FEA) and FLAG North Asia Loop (FNAL) cables in Hong Kong. Hong Kong being one of the landing port for the cable systems, serves an important role supporting and maintaining the smooth operation of the submarine cables.

During the visit to the Cable Landing Station at Tong Fuk, Mr. Chan will introduce the engineering and operation of the Submarine Cable System.
